Assessment Methods

The course is completed after the assessment (assessed as "passed" or "failed").
Prerequisite is completion and timely submission of a course paper

ASSESSMENT METHOD	**ASSESSMENT CRITERIA**
Pass/fail assessment	**Pass or Fail Assessment.** A certain level of learning outcomes is determined below, according to which academic achievement in the subject will be assessed as "Passed". Achieved results at a lower level than meeting the passing criteria are assessed as "Failed".
Course paper and its presentation	Design or analysis of a syllabus. Design/analysis of goals and relevant learning outcomes for the syllabus. Taking account of students' prerequisites and individual differences. Design/analysis of the course material. Choice/analysis of assessment methods. Choice/analysis of teaching models, methods and strategies. Explain your choices. Presentation of course paper (max 10 minutes) on the final seminar. Passing criteria: • compilation of the course paper (analysis of a course); • presentation of the course paper on the final seminar.
PREREQUISITES OF ASSESSMENT	Students should participate in lectures or learn independently the material presented in Moodle, timely submit the course paper and present it on the final seminar (max in 10 minutes) and answer the questions on at least satisfactory level. Peer assessment.
FORMATION OF THE FINAL GRADE	Formation of the final result of the Pass/Fail Assessment is due to the results of the compilation and timely submission of the course paper and of its presentation on the final seminar.

Please do not hesitate to ask if you have any questions or problems

I wish you success!
