

IDU1550 Software Architecture and Design

ASSESEMNT METHOD	ASSESSMENT CRITERIA
Main practical lesson tasks	Are evaluated according to the principles of architecture and design and requirements of the task. This category gives up to 24 points.
Optional lesson tasks	tasks Are evaluated according to the principles of architecture and design and requirements of the task. This category gives up to 20 points
Lecture participation	This is checked by the small tests after half of the lectures. Each test gives 2 points for a 16 point total
Semesters work	Points for semesters work = Main+Optional lesson tasks+lecture participation
Test	Multiple choice test and gives up to 50 points. Test covers lecture topics.
Calculation of the final grade	<p>Point total = Test + Semesters work. Final grade comes from the point total according to the standard TUT 100 point scale (91p or more is 5, 81p or more is 4 etc).</p> <p>For a positive final grade both test and semesters work have to be at least 25 points, otherwise final grade will be zero even if point total is over 50.</p>
