

Estimation criterion: Students have possibility to perform 3 written tests during the semester. Test consists of 20 questions with different difficulty. The highest score is 100 points. The points of tests will be considered in final evaluation with coefficient 0,1.

Students, who pass all the tests over 91 points, will be evaluated without the examination.

The final step is written examination with 20 questions.

Test 1 (KT1) covers topics – introduction, water, proteins, lipids.

Time: about week 5.

Test 2 (KT2) covers topics – carbohydrates, aroma compounds, vitamins, antioxidants and oxydative stress.

Time: about week 10.

Test 3 (KT3) covers topics – minerals, food additives, and contamination.

Time: about week 16.
